ADVANCED ORAL HYGIENE

- **PREVENTION AND CURE OF SOFT TISSUES DISEASES**
- **OPTIMIZATION OF TISSUE'S BIOLOGICAL MECHANISM**

Advanced oral hygiene

ADVANCED ORAL HYGIENE with **LIGHT MODULATION®** is a treatment for gums care and for the prevention of periodontal disease.

- **LIGHT MODULATION®**

is an effective solution for non-invasive therapy **recommended also as a prevention application**, in combination with the standard treatment of oral hygiene; it represents also a significant therapeutic improvement in the pre- and post-surgical treatment, in the **preparation and healing of treated soft tissue**.

- **LIGHT MODULATION®**

optimizes the biological response of gum tissue by stimulating cell regeneration; **gums are healthier and stronger**; it reduces bleeding and has a **strong antibacterial effect** as well. It plays an important action for the reduction of pain.

LIGHT MODULATION® is a quick, non-invasive, painless treatment without any side effects.
