

BYCURE

**Product name: Sepiwhite MSH Essence**

**Code: R101725**

**Packaging:** Dropper bottle, 50 ml

**Class:** Illuminating vitaminic face serum

**Function:** Face serum, illuminating action, with stabilized vitamin C and melanogenesis inhibitor at high concentration complex

**Active ingredients and their function:**

**Ascorbyl tetra-isopalmitato:** Vitamin C Enhanced stable form, it acts on the melanogenesis post-synthesis, by inhibiting the migration of melanocytes towards the epidermis surface; it also facilitates cell turnover, actively reducing the size of present. hyperpigmentation

**Undecylenoyl phenylalanine (Sepiwhite ® MSH complex):** complex inhibitory action on the melanin synthesis primer. The complex affects the production of melanosomes, cell holders that contain melanin and the tyrosinase enzyme, used as a pigment.producer.

**Skin type treated:** Hyperpigmentated skins, (photoaging, sun-exposed scars,)

**Home use directions:** After proper cleansing, apply morning and evening onto face and neck and massage until completely absorbed. Then proceed to the application of the specific daily face cream

**INCI:**
